# Perfect door for family comfort

ET GROUP offers you a new product - the UNITY LIGHT warehouse door program, which combines the New Classic and Contemporary collections, which are loved by designers and architects. Our leading experts have developed universal and most popular models. Thanks to the design, divided into modern and neoclassical lines, and basic white coloring, UNITY LIGHT doors can decorate interiors made in classic, neoclassical, Scandinavian, minimalist and modern styles.

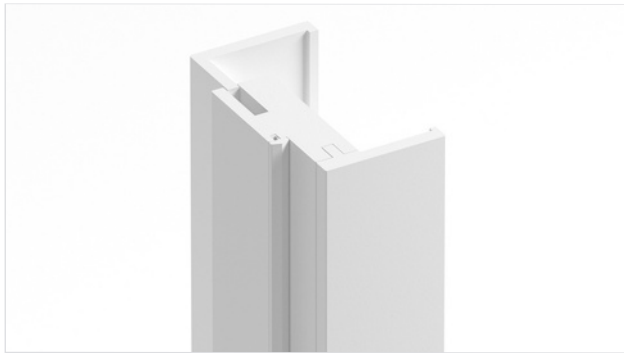

Affordable price, basic equipment with telescopic box and trim, as well as premium materials make the the UNITY LIGHT collection a very profitable and desirable offer. A distinctive feature of the collection is the **fast delivery** of doors from the moment of ordering.

# The main advantages of the UNITY LIGHT collection

## + COMPLIANT PLATBANDS

The front platbands are flush with the door leaf, which makes the door look more elegant, without unnecessary recesses and adds integrity to the design.

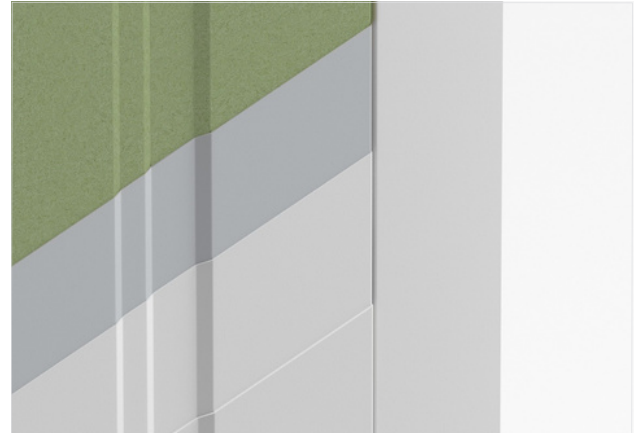

## + TELESCOPIC BOX

The standard door unit is equipped with a telescopic frame and rear trim as standard, which allow mounting doors with wall thicknesses in the most common range of 100-125 mm. If the wall thickness is more than 125 mm, an extension is used.

## + ITALIAN FITTINGS

The door unit is equipped with a reliable magnetic lock and hidden curtains made in Italy.

## + WATER-BASED PAINTS

We use high-quality, environmentally friendly paints and water-based primers from the European manufacturer AKZONOBEL to paint the doors. After applying a special polymer primer, the doors are painted in 2 layers for a more reliable coating.

## + MOISTURE-RESISTANT MDF AND SOLID WOOD

The door frame, platbands and door leaf are made of a combination of solid wood and moisture-resistant MDF. We also offer a skirting board made of moisture-resistant MDF.
