FINISHED PRODUCTS

SERVICES

- *Customised production*

This is a unique service for designing finished products with all your wishes in mind. It can be a single piece, a whole product or even a project with full development. We create unique products, bringing to life the most complex and ambitious projects, even those considered impossible, thanks to the skill, experience and personalised approach of our team.

- *Design development*

If you don't have a drawing for your product, our designer is ready to help you! For an additional fee, we will develop a professional drawing that takes into account all technical features and production requirements.

This service will allow you to:

- ✓ avoid errors in calculation and manufacturing;
- ✓ get a quality product that perfectly matches your expectations;
- ✓ save time by handing over all the details to our specialists.

Entrust the design to professionals - and your product will be flawless!

- *Counselling*

Hoset Wood production will help you to understand all technical nuances and correctly prepare information for production. We will advise you on possible product realisation options, suggest optimal solutions and help you to adapt the project to your production possibilities. Thanks to this, your product will not only be of high quality, but also technologically sophisticated.

ORDER PATH

Step 1

Transmission of information to the manager of all necessary order data (drawings, dimensions, materials, coatings, etc.).

Step 2

The manager forms a commercial offer with price and terms of production.

Step 3

Making the payment and putting the account into operation.

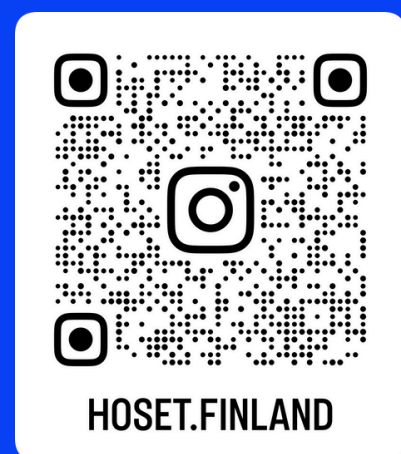

Step 4

The designer develops the technical documentation and sends it to the customer for approval, after which the product is manufactured in accordance with the approved parameters.

Step 5

Order shipment
