HISTORY OF THE COMPANY

Hoset Kids is a family company, each employee of which has contributed to the development of the enterprise. Our team is a young team united by an idea, each member of which invests a part of himself/herself and can be proud of the result.

Why furniture? Our attempts to find good furniture at an affordable price for our children were unsuccessful. And we decided to make beautiful and safe furniture that combines quality, durability, versatility, and environmental friendliness.

In addition, much of the production process is handmade which is an absolute luxury from the point of view of both manufacturers and buyers. And above all, it provides the highest standard.

The undoubted advantages of our furniture are its durability and safety. We do not use chipboard and medium-density fibreboard that contain many harmful substances.

We use only safe materials: water-soluble paints and varnishes, beechwood and birch or beech plywood.

MAIN IDEA

Children grow very quickly, so parents are faced with a choice: either to buy furniture every year or buy furniture sew a dress a size too big “to grow into”. We solve this problem thanks to various engineering and design solutions. In the end, our client receives stylish and safe children’s furniture that can be used for years without worrying about the comfort and health of their children.

OUR ADVANTAGES

- 1** 100 % environmental friendliness of materials:
 - Furniture is made exclusively of wood and multilayer wooden board (see below)
 - All paints and varnishes are water-based and have the appropriate quality certificates
- 2** Versatility and transformability:
 - Adjustable tables and chairs are intended for children aged from 3 years
 - The crib can be transformed into a sofa and a desk
- 3** Safety:
 - Furniture is made of solid parts
 - The minimum number of glued elements (strength)
 - No sharp corners
- 4**
 - Attractive original design
 - Soft pastel colors
 - Relevance of furniture at any age and in any interior
- 5**
 - high quality
 - 10-year warranty
 - quick response of the manufacturer to offers and questions of buyers

ENVIRONMENTALLY FRIENDLY MATERIALS

Our furniture is manufactured only from natural wood materials that meet the highest standards

DONE WITH LOVING CARE

Before being sent directly to our customers' homes, our products go through many processes carried out and controlled by highly qualified specialists.

ODORLESS PAINTS

For painting all the elements of our furniture, we use water-based paints and varnishes made in Germany. They are odorless and have no harmful volatile elements.

ADJUSTABLE HEIGHT

In addition, all our furniture has one very important and useful feature: you can adjust the height. Our beds are of folding design (transformers). In addition, we offer many other innovative features.

CERTIFIED MATERIALS

In the production of furniture for children, it is very important to use high-quality and certified materials. It is a requirement which we scrupulously observe.

MATERIALS

All furniture is made of birch plywood. This material is considered one of the strongest, functional and safe materials. Plywood consists of several layers of wood glued together. Each layer is laid with a change in the direction of fibers that gives the material extraordinary strength.

Unlike solid wood, plywood is not affected by changes in temperature (during the heating season) and humidity (up to 60 %).

Working with this material allows making furniture from solid large elements and avoiding the use of small elements (rails, glued wood, etc.).

For example, a newborn crib is made of 5 basic elements: 4 side panels and a bottom panel, there are no narrow rails, as in the classic models, that can be broken, become unglued, etc. over time.

Plywood is a perfectly smooth natural material that guarantees the complete absence of chips and splitting of thin slices, even if the furniture is used very intensively.

WHAT IS ADJUSTABLE FURNITURE?

Adjustable playing furniture is chairs and tables that “grow” with the child.

They are intended for children aged from 3 years, but even adults can sit comfortably at them or on them.

Tables and stools are adjustable in height; in addition, chairs are both adjustable in height and depth of the back.

To allow a child to enjoy developing and creative games, it is necessary to create all the necessary conditions for this, and this is our furniture that provides them.

WHAT IS ADJUSTABLE FURNITURE?

ADVANTAGES

- Compliance with orthopedic standards: the back is straight, the child does not lean back, legs bent at the knees, elbows are on the table
- Safety: No sharp corners, guaranteed stability due to optimally calculated dimensions, the furniture is very stable
- Formation of aesthetic taste: stylish design, soft pastel colors
- Convenience: the table is equipped with a large and robust pocket for toys

SET SCANDIC #2

TEENAGE BEDS

The beds are of the optimal size — they are comfortable to sleep on both for a child aged 4 years and a 14-years-old teenager.

Some models are completed with a drawer for storing things.

The IndigoWood beds are guaranteed to be a good element of a child's room thanks to their design and high quality!

We have several mandatory requirements for children's furniture in general and teenage beds in particular: beds should be safe, they should be strong, comfortable, and beautiful.

Our beds are made of environmentally friendly wood with the use of non-toxic paints and varnishes.

We use strong and reliable fittings.

TEENAGE BEDS

BUNK BEDS

The two-level decision for rest of the kid.

To create a bright accent in the room of your favorite fidget, it is important to take care of the integral elements of the interior and a reliable bed. A healthy, adequate sleep of your favorite child depends on a comfortable, beautiful area for his/her rest. There are numerous models of bunk beds that have the following design features: compact beds with a variable work area, bunk beds with spacious, multifunctional drawers.

Height of the 2nd floor: 96 cm

Easy transformation in two individual beds

TABLES, DESKS, CHAIRS, STOOLS

When choosing chairs for a child's room, it is important to understand what functions this interior item should perform.

The Hoset Kids chairs are very comfortable, safe, and stylish pieces of furniture that can be used by your child for a long time. Most chairs are adjustable in height that allows them to “grow” with the child and move from the category of “a chair for playing” to the category of “a chair for studying”. It is very important because it allows maintaining the correct posture of the child and avoiding the purchase of new chairs every year.

To ensure the match to the child's height, the height of a chair or table is regulated using wooden pads that can be removed or installed on the legs of the chair, if necessary.

SLEDGE THE SANI

The coolest sled from the existing ones!

Wooden, comfortable, stable, beautiful, and spacious! Impeccably calculated angles allow the sled to be as stable as possible, thanks to its design and size it is convenient to carry children from the age of 1 year to the age of graduating the university. The backrest is removable that allows children to ride the slide while lying down or in the company of a friend. In the summer, sleds can be completely disassembled — they will not take up much space in your home.

KICKBIKE NDIE

A balance bike is a wonderful invention that was refined and adapted for children in the early 21st century. It is designed so that there are no pedals and transmission, and the child can balance by pushing his/her feet off the asphalt. The balance bike is as safe as possible and allows children to move quickly on two wheels and learn to keep balance.

The Hoset Kids balance bike is intended for children aged from 2 to 5 years, as it is possible to adjust the seat height. 12" wheels can be inflated as needed. The Hoset Kids balance bike for kids is the safest, most stable, beautiful bike designed to serve for long life.
