The painting on the wall is only the usual interior detail at first sight. But, in fact, decorating with paintings is a kind of art that requires a lot of mindfulness.

Painting is a clear energetic spot that can emphasize the owner's taste or, backward, mess up the impression of him.

In modern abstract painting, the main point is the style, combination of colors, and manner of the artist's expression. Expressive paintings are the central accent in the interior made with confident, broad strokes, using texture, streams, and splashes.

The choice of painting should be based on the style of the interior. Modern abstraction can completely fit into the room by becoming a noticeable bright spot.
